

Fact sheets for families about Fetal Alcohol Spectrum Disorder (FASD)

To diagnose a child with Fetal Alcohol Syndrome Disorder (FASD) health professionals need to know about:

- things the child does
- the story of their life.

These facts sheets help families get ready to talk to health professionals. There is:

- a checklist that has questions the doctor might ask
- a form that asks for medical history and things you have seen your child do
- fact sheets about some symptoms of FASD.

You can use the fact sheets to learn about FASD. You can use the checklist and form to help doctors understand your child.

We trust this resource

We trust this resource because it is:

- Made to help, not for profit
- Made by people who know a lot about the topic
- Made in Australia

We've checked this resource, and you can [follow our guide to know if health information is true and right for you.](#)
