

Screen me!

[Watch video](https://youtu.be/QHXuhqrwwlQ?si=uJoEPg6jS2CbJISz)(<https://youtu.be/QHXuhqrwwlQ?si=uJoEPg6jS2CbJISz>)

Cervical screening helps prevent cancer. It is important for everyone, including people with intellectual disabilities.

Cervical screening checks that your cervix is healthy. The cervix is a body part at the bottom of the uterus. It connects the uterus and vagina.

You should have cervical screening if you:

- are a woman
- have a cervix
- are aged between 25 and 74
- have ever had sexual contact with anyone, like having sex or touching private parts.

Screen Me! explains who should have cervical screening and how to get it. It can help if you are worried about cervical screening, or don't know what to do.

The film was co-created by the Daffodil Centre, the Centre for Disability Studies and Bus Stop Films. Bus Stop Films makes films with, for and about people from diverse backgrounds and abilities.

Screen Me! is an example of health co-design.
